SUMMARY

I love working with computers and programming, a passion I've had since starting university. As I continue learning and developing my skills in web development, I enjoy creating clean, responsive, and user-friendly websites. I'm looking for a challenging role where I can apply my growing technical skills, continue learning, and contribute fresh ideas to build meaningful digital experiences.

EDUCATION

Bangladesh Army University of Engineering & Technology

Qadirabad, Natore

Bachelor of Science in Computer Science

2022 - 2025

Rajshahi Court College

Rajshahi, Bangladesh

Higher Secondary Certificate; GPA: 4.75/5.00

2018-2020

Seroil Govt. High School, Rajshahi

Rajshahi, Bangladesh

Higher Secondary Certificate; GPA: 4.50/5.00

2013-2018

SKILLS

Web Development: HTML, CSS, JavaScript (Currently Learning and Improving)

Programming Languages: C, C++

Tools & Software: Microsoft Word, Microsoft Excel, Microsoft PowerPoint

LEARNING GOALS

Front-End: React.js, Next.js

Back-End: Node.js, Express.js, MongoDB, MySQL

PROJECT

- Hospital Management System

March 2023 - May 2023

Java, MySql

I created a Java project named Hospital Management System using Java GUI. This system manages doctors, patients, appointments, pharmacists, and admissions. It offers an intuitive interface for efficiently handling these aspects of hospital operations. The project aims to improve operational efficiency and patient care quality.

- Online Routine Management System

Jan. 2023 - Apr. 2023

PHP, HTML, CSS, JavaScript, MySQL

It is a small web-based project aimed at creating a university class routine management system using PHP, HTML, CSS, JavaScript, and MySQL. I created the project along with three other members and was responsible for the documentation. The system streamlines scheduling and management of class routines.

- Foodies Website

Nov. 2025

HTML, CSS

A visually appealing static website designed to showcase food-related content. Built using clean HTML and CSS, the project focuses on layout design, responsive structure, and presentation of food items. It includes organized sections, modern UI styling, and beginner-friendly front-end code.

COMMUNITY AND SERVICES

General Member

- BAUET Computer Society — Contributed to various tech-related events and initiatives

Executive Member

- BAUET Welfare Club — Assisted with organizational activities and welfare programs.
- Held the role of **Officer (Branding & Promotion)** for Hult Prize at BAUET, supporting event marketing and campus engagement.

Officer (Branding & Promotion)

- Hult Prize at BAUET — Supported event marketing and campus engagement.
